The Director's "special list"

Harold Weisberg 9/19/79

Attached is a Not Recorded Serial from 62-109090, of 2/7/64. It is also 62-109060-2385.

The note on page 2 is one of many references in the Commission file to the Director's "Special List."

This appears to have been a list of matters of particular interest to the Director relating to the assassination investigation and the Commission.

The list also appears to have been available throughout the FBI, so that the Director's particular interests could be served.

However, I have not been provided with a copy of this special list.

Obviously it is a matter of considerable historical importance.
